Version1.0	Edwin		30/11/2020	初版

## 新增、修改測試項

在 `com.mtest.activity.MainActivity.java` , 如下圖的 method 加入新增的 class 和 string

注意, 需要修改相對應的 `MtestConfig.TEST_MODEL_DEFAULT` , 根據 model 新增需要的功能

## (1) 新增 , class map 對應 Activity

例如新增 `mClassMap.put("HDCP Test", HDCP_Activity.class);`

```
// activity map is used to find a correct intent activity when a test item is clicked
private void initActivityMap()
{
    ***
    mActivityMap.put("LED ON/OFF", LED_ONOFF_Activity.class);
    mActivityMap.put("HDCP Test", HDCP_Activity.class);
    mActivityMap.put("USB 1 Test", USB_Activity.class);
    mActivityMap.put("USB 2 Test", USB_Activity.class);
    mActivityMap.put("HDCP 1.x Test", HDCP1xActivity.class);
}
```

## (2) 新增 , 測項字串

例如新增 `HDCP Test` 到 `enableItemPureIP[]` 裡面

```
String[] enableItemPureIP = {
    "NTSC/PAL Information Te
    "LED ON/OFF",
    "Power Saving",
    "Smart Card Test", //cent
    "HDCP Test",
    "USB 1 Test",
    "USB 2 Test",
    "SD Card Test", // Edwir
    "WIFI Test", // wifi
    "BlueTooth Test", //...
};
```

### (3) 新增，測項白名單，設定 focus

測項字串必須包含在內才可以 focus，例如 **HDCP Test** 必須包含在 **selectableItems[]** 裡面，**HDCP Test** 才可以被 focus 並啟動

```
// Edit array to decide whether a test item can be selected
private boolean isItemSelectable(String item) {
    String[] selectableItems = {
        //getString(R.string.str_tv_item_01),
        "Front-Panel Key",
        "7 Segment ON/OFF",
        "LED ON/OFF",
        "Slow Blanking(4:3/16:9/TV)",
        "Fast Blanking(CVBSRGB)",
        "Antenna 5V ON/OFF",
        "LNB ON/OFF",
        "DiseqC 1.x/2.0",
        "Modem Test",
        "Cable Modem Test",
        "COM Port Test",
        //getString(R.string.str_tv_item_13),
        "CI Test",
        "HDCP Test",
        "RF Modulator",
        //...
        "HDD Test(PVR)",
        //getString(R.string.str_tv_item_20),
        "Power Saving",
        "EEPROM Test",
        "OOB Test",
        "Moca Test",
        "Light Sensor Test",
        //getString(R.string.str_tv_item_26),
        "Buzzer ON/OFF",
        "Microphone Test",
        //...
    };

    for (String selectableItem : selectableItems) {
        if (item.equals(selectableItem)) {
            return true;
        }
    }

    return false;
}
```

#### (4) runAutoTests() 測項功能

若有需要，新增 HDCP Test 測項功能

```
private void runAutoTests ()  
{
```

```
    ...  
    item = "HDCP Test"; // HDCP  
    if (mEnableItemList.contains(item)) { // if test exist  
        testResult = mPreferences.getInt(item, TEST_RESULT_NONE);  
        if (testResult != TEST_RESULT_PASS) {  
            checkHDCP();  
        }  
    }  
}
```

#### MtestConfig 新增 Model

```
package com.mtest.config;
```

```
import ...
```

```
public class MtestConfig {  
    public static final int MTEST_MODEL_NONE = 0x0;  
    public static final int MTEST_MODEL_3796 = 0x1;  
    public static final int MTEST_MODEL_3798 = 0x2;  
    public static final int MTEST_MODEL_RTK1319_PURE_IP = 0x3;  
     public static final int MTEST_MODEL_MSTAR = 0x4; //centaur 202006:  
    public static final int MTEST_MODEL_DEFAULT = MTEST_MODEL_NONE;
```

1. 新增 model，例如 MTEST\_MODEL\_3796
2. 設定 default model 例如 MTEST\_MODEL\_DEFAULT = MTEST\_MODEL\_NONE;

## 刪除測試項

### (1) initMenuItems() 移除測試項

註解掉測試項目後，則不會顯示在畫面上，例如 HDCP Test

```
private void initMenuItems() {
    String[] enableItemPureIP = {
        "NTSC/PAL Information Test", // edwin
        "LED ON/OFF",
        "HDCP Test",
        // getString(R.string.str_tv_item15),
        "USB 1 Test",
        "USB 2 Test",
        "SD Card Test", // Edwin 20200507 add
        "WIFI Test", // wifi
        "BlueTooth Test", //...
    };
};
```

### (2) runAutoTests() 測試項

由於 步驟(1) 註解掉項目，測試項沒有被加入 `mEnableItemList`，不包含 HDCP Test，因此 `runAutoTest()` 將不會執行 HDCP Test 測試

```
private void runAutoTests ()
{
```

```
    ...
```

```
    item = "HDCP Test"; // HDCP
    if (mEnableItemList.contains(item)) { // if test exist
        testResult = mPreferences.getInt(item, TEST_RESULT_NONE);
        if (testResult != TEST_RESULT_PASS) {
            checkHDCP();
        }
    }
}
```
